

Cabinet locks

Integrated solutions for private and public cabinet/locker applications.

Cabinet Lock Series

Cabinet Lock

Series

Kcolefas offers comprehensive solutions for cabinet/locker applications. Our reliable, robust and stable cabinet locks are fully qualified for private and public cabinet applications.

Our main products are keyless combination cabinet locks for solving the "key" problem. By simply using a pre-set code, you can open the lock without the need of a key. Combination cabinet locks are highly welcome in public places where remembering a code would be much easier than carrying on a mechanical key.

Kcolefas' cabinet lock just brings you convenience and pure safety.

Cabinet Lock

30500
